

INDUSTRIAL WATER TREATMENT PLANT

Nakclean Water Solutions has been promoting a wide range of water Purifiers to the drinking and Process Water for the industrial and institutional Clients. Conforming the highest level of manufacturing excellence, These Products ensure that our clients enjoy a healthy life. Thanks to this commitment to product quality, Nakclean Water Solutions is today in the vanguard of the water Purification Industry.

Going Beyond Drinknig and Process Water, Nakclean Water Solutions now offers customized , total water and waste water treatment solutions.

AREA OF EXPERTISE

Industrial RO Plant	Electrocoagulation System (ETP)
Effluent Treatment Plant	Water Softener
Packaged Sewage Treatment Plant	Desalination Plant

Application

- ✓ Process Water for Industrial Application.
- ✓ Boiler Feed Water
- ✓ Water Purification System for School. Colleges,
- ✓ Hotels, Hospitals, Mall & Multiplex.
- ✓ Beverages & Food Processing Industry.
- ✓ Pharmaceutical Industry for High Purity Water

INDUSTRIAL RO PLANT

SYSTEM FEATURES :

- Completely assembled/ Pre-Piped/ Pre-wired
- Auto start/Stop based on water level in the Tank
- MCB for Plant Protection
- Raw water pump integrated with plant
- Inbuild Protection to High Pressure Pump by way of Low Pressure Switch/ High Pressure Switch
- Membrane from Dow/GE/Hydranautics/Torray
- Glycerin filled SS Pressure gauges for durability
- Online Rotameter for Measuring Permeate/ Reject Flow
- SS Skid/PU Coated MS Skid
- Customized Electrical Panel with Hour Meter
- Automatic Backwashing of filter available as premium Range

STANDARD INSTRUMENTS

- Flow Meter
- Pressure Switch
- Pressure Gauge
- Level Sensor
- Conductivity Meter

Option

- Automatic Backwashing System
- PH Correction System
- Cleaning System
- Post Filtration System
- Remote Monitoring Station

For Heavy Industrial Application

We are Provide Industrial RO Plant from 1 M3/H to 50 M3/H.

Specification, Features and colour are subjected to change without prior notice due to continuous product increments.
