

SEWAGE TREATMENT PLANT (STP) FOR REUSE WASTE WATER

We are Building Next Solutions for Environmental Responsibility...

Since 2012, **M/S. Nakclean Water Solutions** (ISO 9001:2015 Certified Company) works with you to make your business more environmentally responsible with maximum your profit. We are provide complete treatment System for your sewage water make into pure water. Which you can utilize to another process like gardening, flushing System. And make your organization as zero Discharge Water unit. By Taking awareness of Save Environment & Water, Which Polluted by human.

Who Can Use ? (1)Organization Which haven't any Drainage/Discharge System (2)Farm-House (3)Hotels (4)Residency (5)School (6)College (7) Shopping Mall (8) Industry

ADVANTAGE:

No Process Chemicals Required – This treatment system requires no chemicals. The system is Periodically clean with Air.

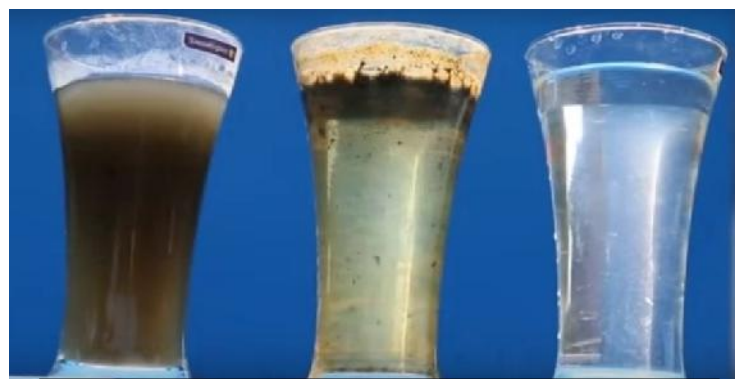

Operating Cost – Beside Manpower, Only Operating cost are power and periodically Plate Replacement. Our System Consumption Optimum Power.

Minimal Main tance – Maintance is limited. Only Electrode Plate Replacement Periodically. And Filter-Press Cloths Replace Periodically.

Atomization - Our system is fully PLC based Automatic Control System with safety & Shock Preventing.

Sludge Holding – Our System have high sludge Holding Capacity. With Semi-Auto and Manual Function.

Efficiency – Our Treatment System remove 90-95 % oil. Heavy Metals, Hydrocarbons and Suspended solids. And give complete result for Reuse Water.

	Conventional System		Electro-Coagulation System	
Project Cost	Less	✓	Little High	✗
Civil Construction Cost	High	✗	Not Require	✓
Operating Cost	High	✗	Less	✓
Area Req.	More (Heavy Civil construction)	✗	Less (Multi- stored type mechanical const.)	✓
Smell/Odor	Chances	✗	No Chances	✓
BOD/COD Remove	70-78 %	✗	90-95 %	✓
Sludge Dry Process	More Time	✗	Quickly	✓
Power Consumption	More	✗	Less	✓
System Operating	Manual	✗	Automatic	✓
Skilled Man-Power	Require	✗	Not Require	✓
Operating Difficulty	High (Chemical Storage+Tansportation + Dossing Ratio)	✗	Very Less (Operate By Single Hend)	✓
Handle Shock Load	Not Possible (Study operation)	✗	Possible (By Changing of Operating Value)	✓
Mobility	Not Possible	✗	Possible	✓
Sludge Handle	Daily	✗	After 8-20 Days	✓

FEATURES
Pre-Filter
EC Reactor (Aluminum Electrode)
DAF System
Filter - Press 900×900 mm
Auto Panel With PLC Based Programing
Post Filtration System
Air-Compressor
Auto Clean System with Air - Scouring
UF (Ultra-Filtration) System (For Premium Quality Recycling Water)
